

[ACCREDITATION]

ISO 9001:2015

This standard is based on a number of quality management principles including a strong customer focus, the motivation and implication of top management, the process approach and continual improvement.

[BENEFIT]

THE BENEFIT

Working with an ISO 9001:2015 certified supplier, you have the reassurance of working with a team that is customer-focused, quality-led and constantly striving to exceed your expectations.

ECS (previously CSCS)

The Electrotechnical Certification Scheme (ECS) accredits the qualifications and experience of workers in the UK construction industry.

THE BENEFIT

Holding an ECS card confirms a site worker has the required qualifications and training to carry out the work for which they are employed on a construction site.

IPAF and PASMA

These certification and logbook systems allow technicians to safely work at height, using a wide range of cherrypickers, towers and scissorlifts safely.

THE BENEFIT

Using IPAF and PASMA certified suppliers means you know all powered access equipment on your site will be operated by trained professionals, ensuring a safe site and efficient working.

SSSTS and SMSTS

These citb qualifications provide supervisors with an understanding of health, safety, welfare and environmental issues.

THE BENEFIT

These qualifications for supervising safely on construction sites ensure that your supplier will work with safety and best practice in mind at all times.

PRINCE2

PRINCE2 embodies established and proven best practice in project management.

THE BENEFIT

PRINCE2 gives a common vocabulary for all those involved in a project, ensuring effective communication.

OPITO, BOSIET, HUET, EBS

These specialist courses give the necessary training to enable suppliers to work safely on offshore oil, gas and wind installations.

THE BENEFIT

You will have peace of mind your supplier has the required training to work efficiently within these very specific, technical environments.

IOSH, CHAS and SSIP

These highly targeted courses provide suppliers with wide ranging health and safety related skills and knowledge.

THE BENEFIT

Using suppliers with these accreditations ensures a safe working culture and environment on your project, for everyone.

UK Renewables WTG Working at Height & Rescue

These courses allow suppliers to work safely on specific renewable energy sources such as wind turbines.

THE BENEFIT

These courses further ensure that your supplier can also rescue others at height, ensuring greater safety across your site.
